Complete Security Solution

**The Complete Security Solution provides a comprehensive solution for securing premises, property and people at any size multi-residential, commercial or public site.**

Meet a pressing market need

Commercial security is often a multi-platform proposition. Many stores, factories, offices, healthcare facilities, educational institutions and other campuses need to control access, detect intruders, and be able to visibly verify their security. As a result, end users often struggle to manage multiple disparate security applications.

Common issues include:

- Limited cross-application visibility and control
- Double-work and workarounds required for common daily tasks
- Complex installation and maintenance experiences
- Partial coverage, lacking one or more security applications

CONTROL

Kantech Access Control

A complete portfolio of easy-to-use, scalable access control solutions that deliver an unmatched user experience for end users and dealers.

KANTECH

DETECT

DSC PowerSeries Neo Intrusion Detection

A comprehensive and versatile hybrid system that combines the flexibility of a modular, hardwired system with the simplicity of wireless devices and peripherals.

Pre-integrated,
best-of-breed security

The Complete Security Solution provides best-of-breed intrusion detection, access control and video surveillance all from a single, trusted partner. You can deliver a full solution to your customers with ease and confidence; and business owners and security personnel can manage all aspects of on-premises physical security from a single interface – via Kantech or exacqVision.

Capabilities Highlights

- Operate and manage enterprise-wide security systems via one seamless interface
- View partition and zone status on cameras
- Receive push notifications for triggered intrusion and access control alarms
- Instantly see video verification of access control and intrusion alarms
- Gain complete control on- and off-site, using a suite of mobile apps

Kantech Access Control

- EntraPass performance software, compatible with all Kantech door controllers, enables secure, quick and efficient operation of any number of doors where card access is required
- EntraPass Web and EntraPass Go enable remote and mobile visibility and control

exacqVision Video Surveillance

- exacqVision VMS software gives end users the flexibility they require to effectively monitor video, audio and data in real time
- The Exacq Mobile app allows users to monitor their premises via their mobile device

DSC Intrusion Detection

- PowerSeries Neo intrusion systems provide end users with ultimate reliability, advanced features and easy scalability
- Hybrid wired system with PowerG wireless devices and peripherals enables use of a mobile app to control the system from anywhere

Do better business

Gain a new competitive advantage and boost customer loyalty by becoming their single trusted security solutions provider.

Increase your revenues

Win more jobs, with an easier sell than multiple brands, and a lower total cost of ownership.

- Add new revenue streams
- Capture more of your customers' security spend
- Faster, more profitable installs
- Reduce onsite service calls

Expand your portfolio

Partner with the industry's largest security brand's quality products, innovation and services.

- Easily expand into security applications that you don't currently offer
- Provide customers with more options and the best user experience

Upsell

Upgrade current customers and attract new customers.

- Add value to existing installs by offering more complete end-user functionality
- Offer a staged approach to suit customers' budget strategies
- Engage new customers with starter installations, and grow them from there

Optimize your customers' experience

Save time and cost for your customers with a single-touchpoint security solution with integrated access control, video surveillance and intrusion.

Simplified and more effective management

- Flexible control of all three platforms from both Kantech and Exacq interfaces
- Increased operator control
- Easier, single-vendor management
- Multi-platform workflows can reduce response times to critical alarms and events

Remote management and control

- Reduces visits to distributed sites
- Speeds reaction and response times

Scalability and reduced cost of ownership

- One server for multiple security applications reduces hardware, power and cooling costs
- Once one platform is installed, adding basic capabilities from another platform is cost-effective
- Ideal for any business or organization, from a single site to a global deployment

Video surveillance
– Exacq

exacqVision Video Management System (VMS) Software

Records surveillance video from thousands of IP camera models and displays it on client software, in a web browser or mobile app.

- Effectively monitor video, audio and data in real time - customizable video wall, two-way audio, interactive mapping, notification overlays and more

- Reduce review time and conduct investigations seamlessly - video bookmarking, powerful search capabilities, video export in standard formats or as a self-contained, tamper-protected player

exacqVision Windows Network Video Recorders (NVR)

- A-Series – all-in-one hybrid server and IP camera server solutions

- Z-Series – high-performance network video recorders supporting up to 500 remote clients

End users can also manage intrusion and access control via exacqVision VMS

- Monitor zone status
- Arm, disarm, silence zones
- Monitor door status
- Control doors
- Search video related to alarm and door events

Complete Security Solution

Access control
– Kantech

EntraPass Corporate Edition Security Software

A multi-workstation software platform that offers the ultimate balance between power and affordability in a network environment.

- Supports up to 20 workstations and controls hundreds of thousands of doors

- Integrates with EntraPass Go and EntraPass Go Pass mobile apps and EntraPass Web platform, delivering remote and convenient access to common access control, video and intrusion tasks and reporting

- EntraPass Go Install mobile app enables easy configuration

- Compatible with Kantech IP devices such as KT-400 / KT-1 controllers

- Double and triple swipe card at reader (with KT-400 controller) to activate such features as: activate relay, arm alarm system and lock/unlock doors

- Integrates with ASSA ABLOY Aperio wireless locks for integrated lock solution

End users can also manage intrusion and video via EntraPass software

- Monitor zone status
- Arm, disarm, silence zones
- View live video
- Trigger video recording actions
- Search video related to alarm and door events

Complete Security Solution

Intrusion alarm
– DSC

PowerSeries Neo Intrusion Systems

Complete hybrid wired/wireless intrusion security for any premises, from large residential to large light-commercial.

- Combines the reliability of traditional wired security with the accessibility and scalability of wireless systems

- PowerG wireless technology

- Highly scalable and customizable

- Wide range of peripherals, including devices powered by PowerG long-range, long-battery life wireless technology

- Supports visual and audio alarm verification

- Enables mobile access to intrusion system

- Choice of 4 control panels ranging in capacity from 16 to 128 zones
